Providing People with the Power to do Amazing Things

## CAPABILITIES

- STRATEGIC ASSET MANAGEMENT
- TACTICAL ASSET MANAGEMENT
- IEC61850 SUBSTATION SYSTEMS INTEGRATION
- TECHNOLOGY & CHANGE STRATEGY
- BUSINESS CASE DEVELOPMENT
- PROCUREMENT SPECIFICATION
- STANDARDS DEVELOPMENT
- PROTECTION PHILOSOPHIES
- SUBSTATION DESIGN & SETTINGS
- COMMUNICATIONS & SCADA
- COMMISSIONING
- FAULT INVESTIGATIONS
- TRAINING
- CYBER SECURITY
- SOFTWARE DEVELOPMENT

## Asset Management Services

### STRATEGIC AND TACTICAL ASSET MANAGEMENT

Power systems are complicated and there are many things that can lead to a power outage. Jarrah Solutions can assist companies with the development of strategic asset management plans to mitigate the risk of unplanned power outages while simultaneously minimising operational maintenance costs.

Achieving this efficiently requires a knowledgeable, intelligent and customer focused approach. Jarrah Solutions staff have decades of experience in power systems including the development, integration, maintenance and security of technology in power systems applications.

Supporting day-to-day operations, Jarrah can also offer electrical asset integrity inspection, monitoring and auditing services.

## Technology Development

### PROTECTION, IEC 61850 AND AUTOMATION

Jarrah Solutions staff have many years of experience in developing, delivering and maintaining new technology in power systems applications. Technology experience includes the international standard IEC 61850, runback schemes, remote-connectivity and data historian solutions.

Implementation of new technology or process improvements will lead to real or perceived increases to the risk profile. Jarrah Solutions can help customers manage these risks to ensure safe and reliable delivery.

## Solutions Delivery

### Design, Build, Test and Maintain

Jarrah Solutions can help critical infrastructure companies and utilities with the efficient connection and maintenance of large electrical loads, complex generators or new customer connections.

Jarrah Solutions can help with replacing ageing power systems assets and delivering upgrades to protection, automation and SCADA systems.
